Dear Sir/Madam,

The PHARMO team will attend the ISPOR Annual European Congress in Berlin, Germany, November 3-7, 2012.

You are kindly invited to booth #59 to meet us, so that we can provide you with more information about the PHARMO Research Database Network and our expertise in pharmacoepidemiology and drug outcomes research, also in the European-wide setting.

Our goal is to provide a platform for studies that will allow evidence generation for health outcomes, health economics and risk management strategies.

The patient-centric PHARMO Database Network enables our professional research team to conduct real-world studies across all pharmacotherapeutic areas.

If you wish to make an appointment with PHARMO, please let us know by sending a message to pharmo@pharmo.nl.

We look forward to meeting you at ISPOR!
